

```
import React from 'react';

const Greeting = () => {
  const currentHour = new Date().getHours(); // Get the current hour

  // Conditional Rendering based on the current time
  let greetingMessage;

  if (currentHour < 12) {
    greetingMessage = "Good Morning";
  } else if (currentHour >= 12 && currentHour < 18) {
    greetingMessage = "Good Afternoon";
  } else {
    greetingMessage = "Good Evening";
  }

  return (
    <div>
      <h1>{greetingMessage}</h1>
    </div>
  );
};

export default Greeting;
```

```
import React from 'react';
import Greeting from './components/Greeting';

function App() {
  return (
    <div className="App">
      <Greeting />
    </div>
  );
}

export default App;
```
