

```
import React, { useState } from 'react';

const LoginStatus = () => {
  const [isLoggedIn, setIsLoggedIn] = useState(true); // Change to false to
test

  return (
    <div>
      {isLoggedIn && <h1>You are logged in</h1>}
      {!isLoggedIn && <h1>Please log in</h1>}
    </div>
  );
};

export default LoginStatus;
```

```
import React from 'react';
import LoginStatus from './components/LoginStatus';
function App() {
  return (
    <div className="App">
      <LoginStatus />
    </div>
  );
}

export default App;
```
